STORYBOARD

PROBLEM: HEAVY TRAFFIC EVERYDAY...

SOLUTION: ELECTRIC SKATEBOARD

START PROJECT

LAUNCHING

PSYKOBORD

Parameter values	
Product name	Psykoboard 2 e 2.2 electricboard
Riding Speed	20/35/40 km/h
Climbing grade	25%
Certificate	CE, FCC, RoHs, MSDS, UN38.3
Style	Dual brushless in-wheel motors
Motor power	2x1100W
Wheel Rubber	Exchangeable wheels, freewheeling when you push
Range	12-15 km (X-Bp10); 25-28 km (X-BP20)
Battery	Li-Poly battery
Charging Time	2 hrs
Charge Times	1500 times
Charging Requirements	AC110~240V; 50~60Hz
Support material	Aluminium alloy + ABS
Best working temp.	25°
Remote unit function	2 speed modes switchable
Safety protect	safety wrist strap
Absorption	shock absorption gasket
Waterproof level	IP65

MOTORE

I due motori ruota brushless, garantiscono un'accelerazione di coppia di avviamento e prestazioni di salita formidabili (climbing grade 25%) e i pneumatici delle ruote motrici sono sostituibili.

Il sistema elettronico e i motori elettrici sono completamente impermeabilizzati dal momento che il motore è alloggiato all'interno delle ruote, con un sistema di raffreddamento e con la frenata autorigenerativa, per ricaricare la batteria Li-Poly. Un confronto con i motori ruota brushless elettrici interni, i motori di Psykoboard generano meno calore, sono protetti dalla polvere e dall'acqua (waterproof level IP65), con migliori prestazioni, efficienza e affidabilità, quindi sicurezza al TOP.
