About Us

Keethings is an Industrial Internet of Things (IIoT) Company delivering

an innovative Conversational Platform that boost

the factory digitization by simplifying the communication

between machines, applications and humans

Company Vision

"We enable Companies to improve dramatically their margins by managing operations in real time, optimizing the workforce and lowering cost and time of their manufacturing processes"

Conversational Platforms among Gartner's Top 10 Technology Trends for 2018
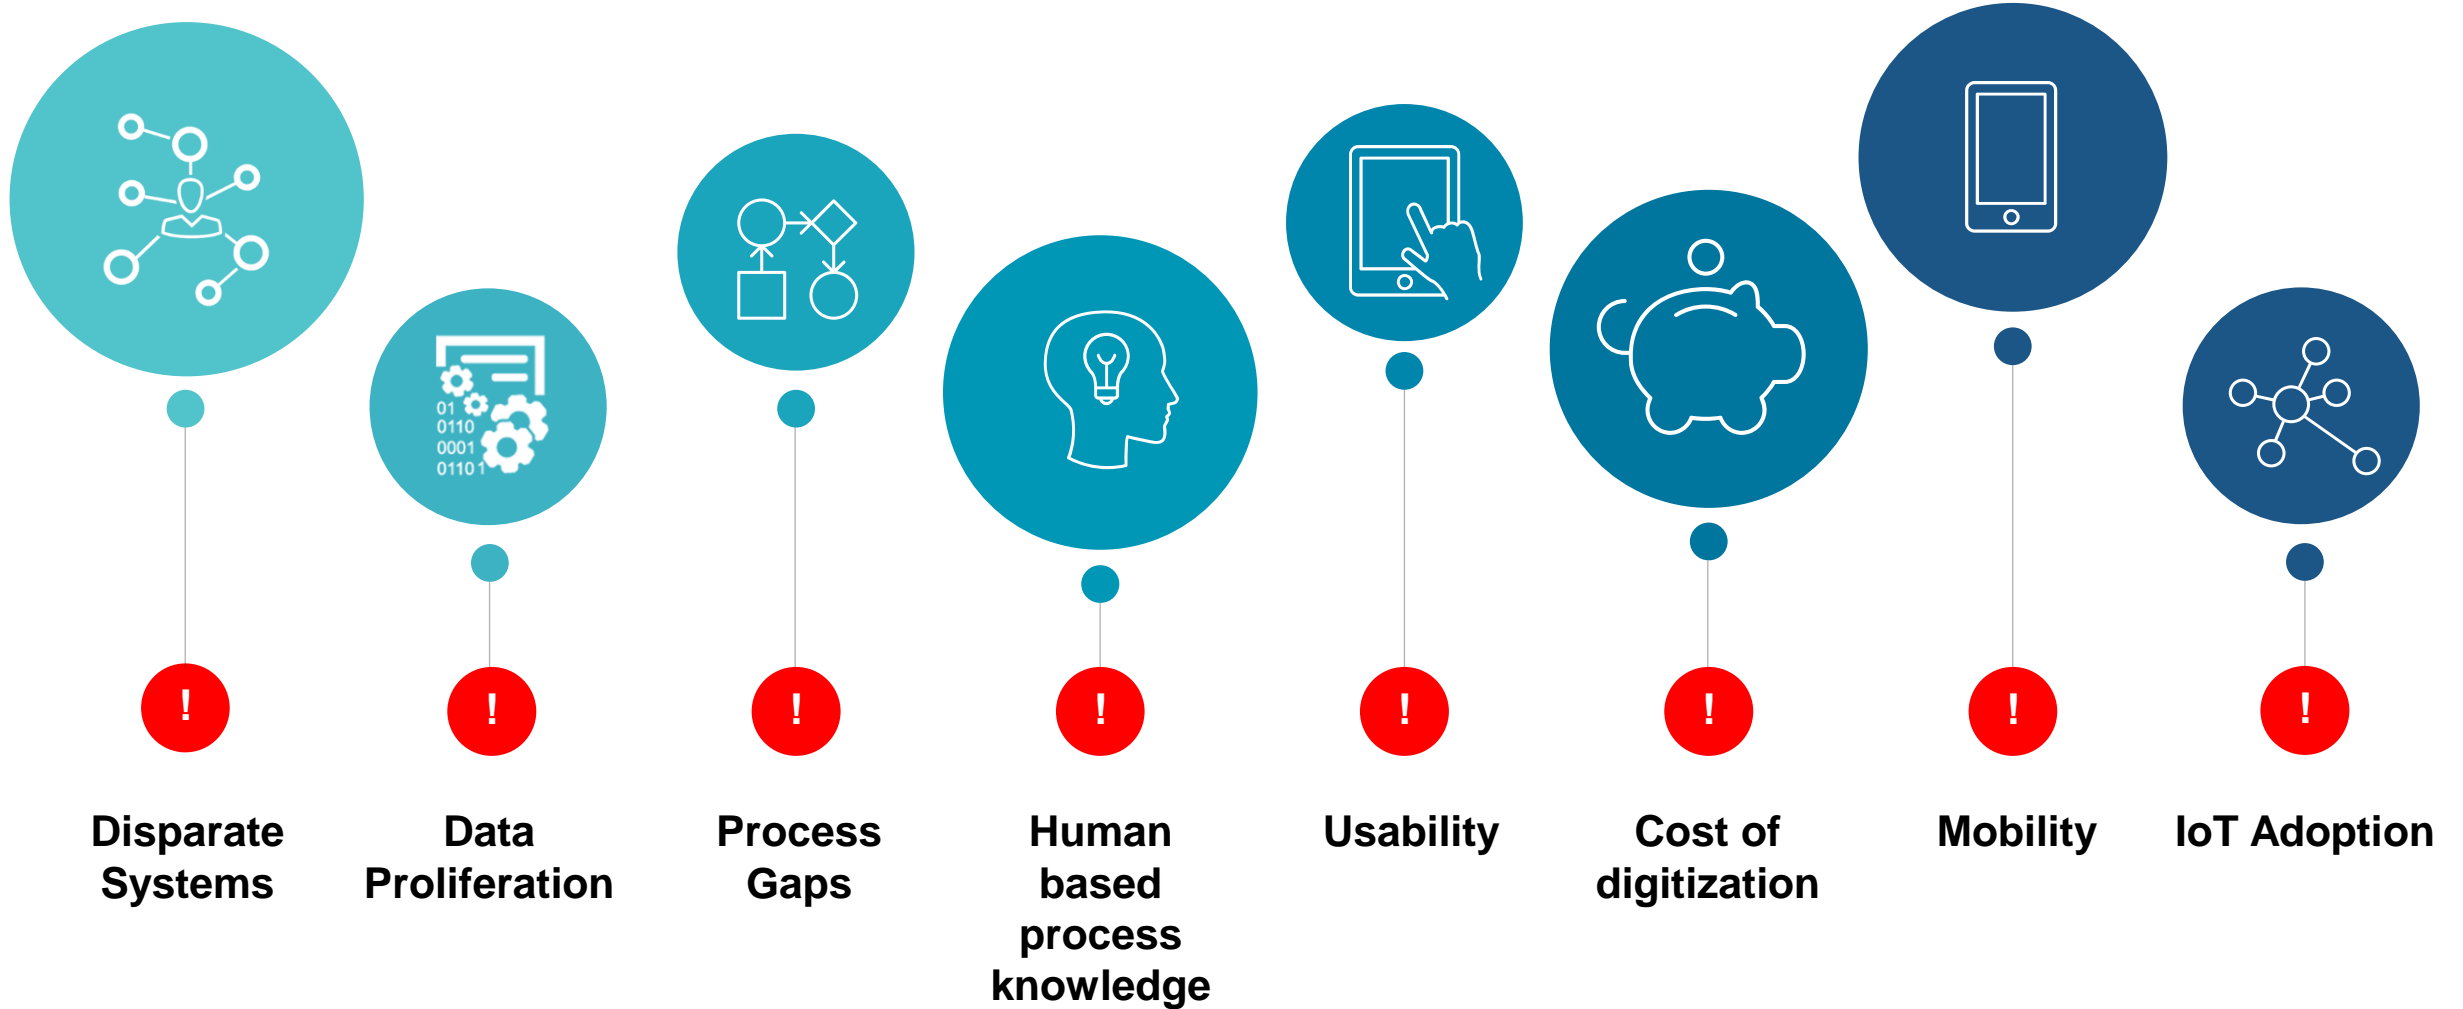

Apps to create rich and robust conversations at all times

" *The challenge that conversational platforms face is that users must communicate in a very structured way, and this is often a frustrating experience. A primary differentiator among conversational platforms will be the robustness of their conversational models and the API and event models used to access, invoke and orchestrate third-party services to deliver complex outcomes.*

Gartner Top 10 Strategic Technology Trends for 2018

Industry Pain Points

Disparate Systems

Data Proliferation

Process Gaps

Human based process knowledge

Usability

Cost of digitization

Mobility

IoT Adoption

Why Keethings

# Unique Value Proposition for maximum optimization of the processes

SIMPLE & SINGLE UI ENABLING REAL-TIME INTERACTIONS

Use Instant messaging and rich cards to add easily comments, collaborate and assign tasks. Break barriers between departments and shifts, follow your factory in real time, and simplify your day-to-day operations by focusing on important task.
WORKFLOW TO MANAGE PEOPLE AND PROCESSES

Configure workflows simply to automate and faster decisions based on data from systems, machines and workforce. Optimize operation time and cost by making available precise and relevant data to each employ involved in the processes

BOTS TO INTEGRATE & COMMUNICATE AUTOMATICALLY

Transform every Company assets in a "talking object", simplify interactions with complex processes and machines data, automate the decision making using our distributed intelligence framework
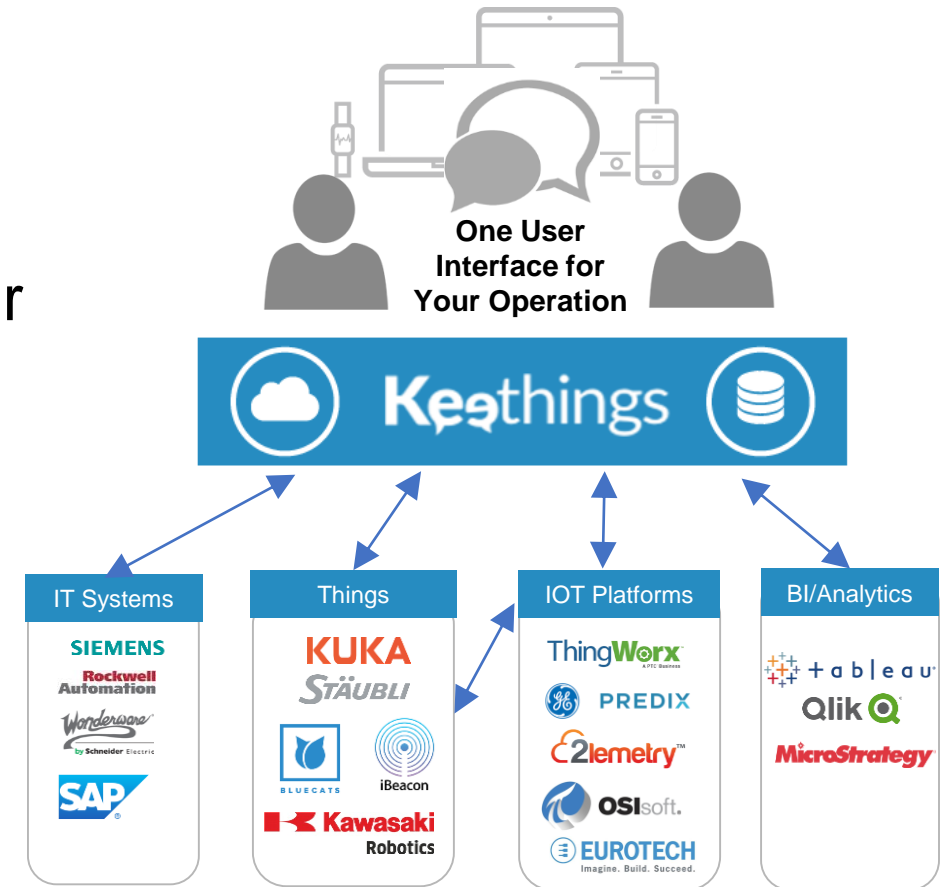

KNOWLEDGE BASE TO SOLVE PROBLEMS IN REAL TIME

Quickly find solutions by sharing employees' expertise and company knowledge. Create easily "frequent questions database" to solve faster recurring issues that affected equipment and provide real time support by our manufacturing assistant "Smarty".

Keethings

Complete, Scalable and Secure IIOT Conversational Platform

- Platforms & Hardware agnostic
- Easy to integrate with:
  - Corporate systems and IOT Platforms
  - Sensors/Machines through APIs, OPC, or specifc protocols
- Cloud, on premise and hybrid deployment
- Enterprise grade security standards
- Analytics to control operations
- Advanced UI – based on Material Design guidelines

One User Interface for Your Operation
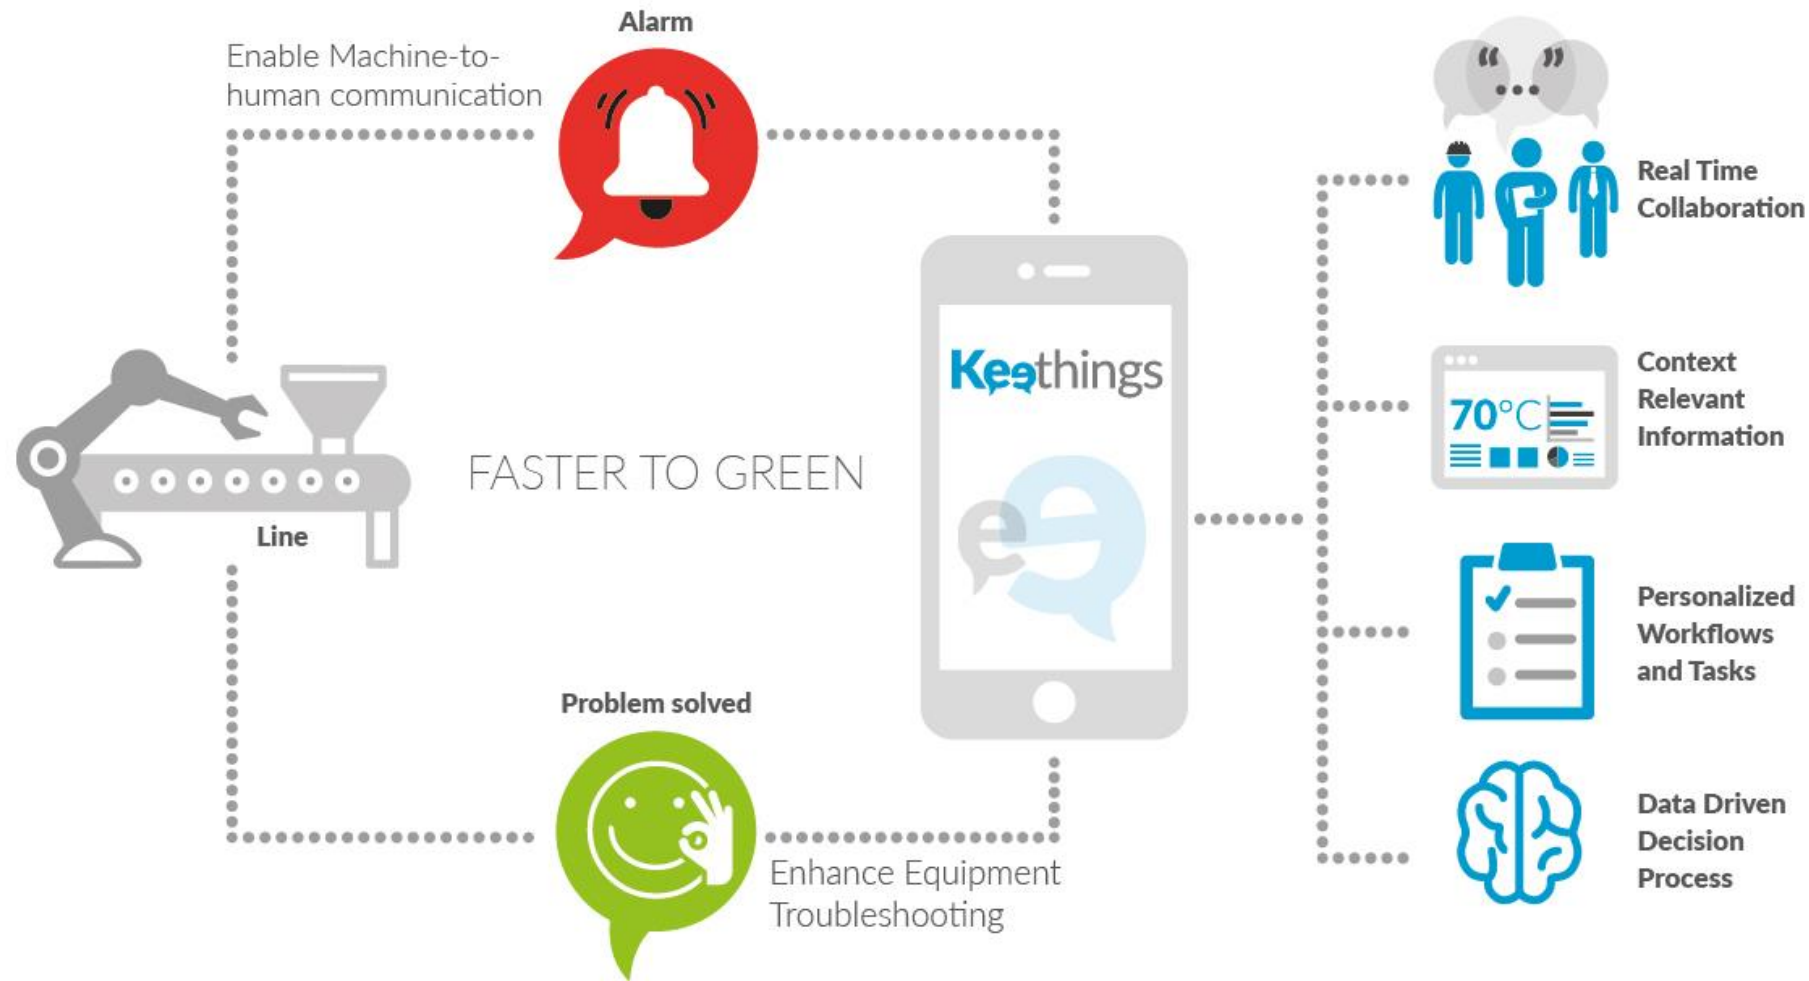

IT Systems — Things — IOT Platforms — BI/Analytics

Our customers

 Alarm Management

 Performance Management

 Logbook Management

Use case: alarm management
