

tocket

Problems

Scalping

Exchange between users

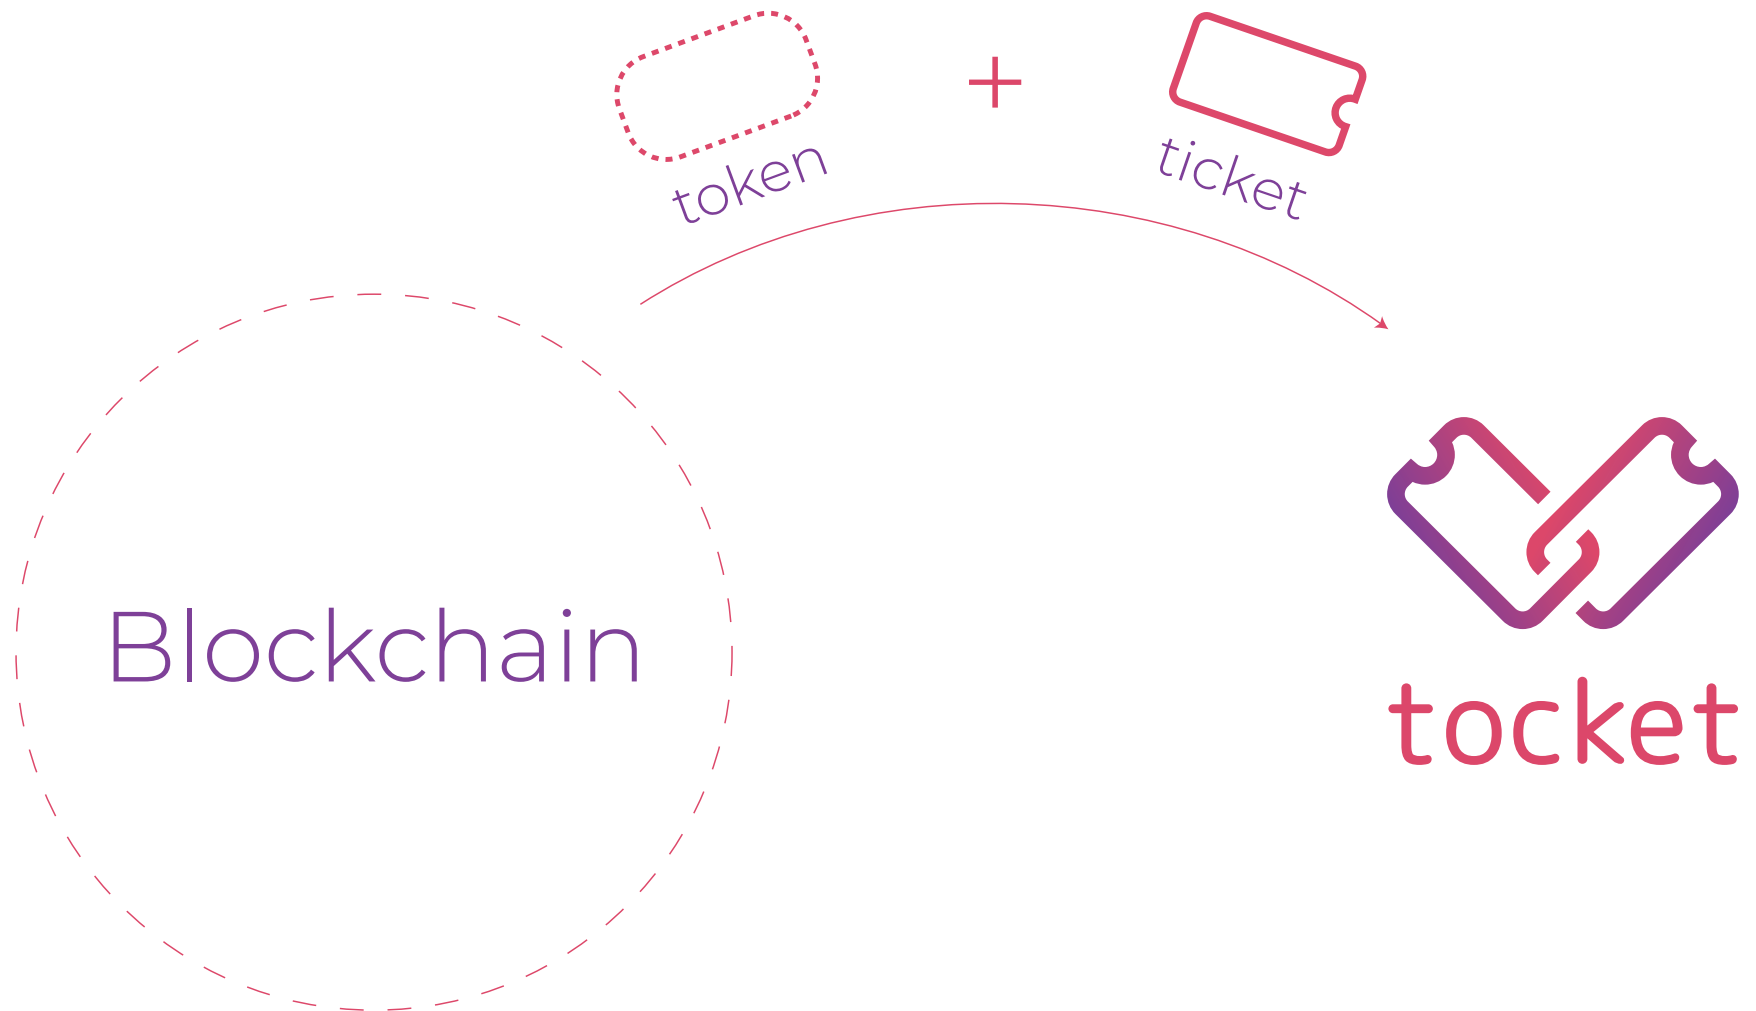

Ticket replicability

Slow check-in

In the Blockchain we merged the idea of ticket with the token one, thus creating a new model!

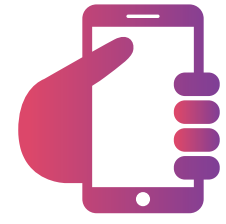

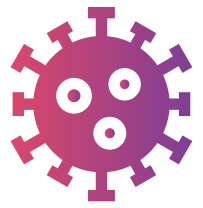

Univocal ticket

Transfers
in Blockchain

Digital ticket

Automatic attendance
report for COVID-19

Transaction traceability

Safe exchange

Business Model

tocket

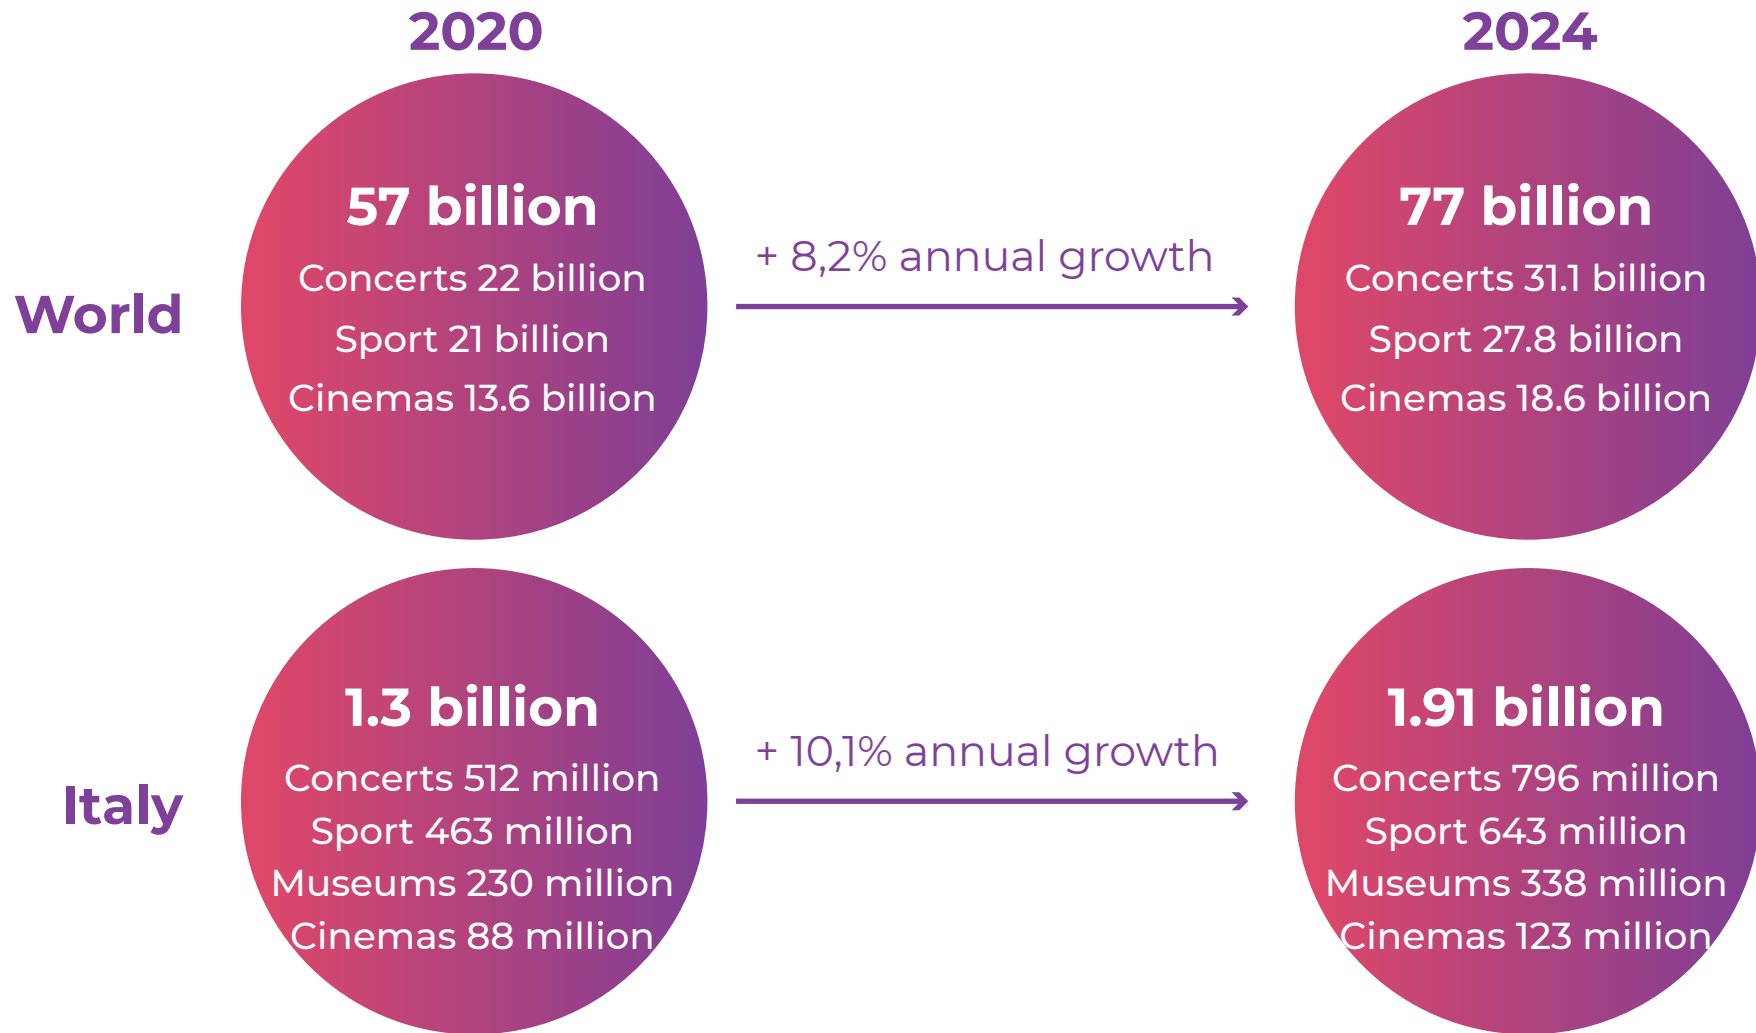

We'll earn only from the primary ticketing service, because we think the secondary ticketing service is fair to be included in the Tocket ecosystem

%

primary ticketing

~~Fee~~

~~secondary ticketing~~

These reports do not take into account theater events and other types of events, that will cause the market to increase further.

*Everything has been forecasted before COVID-19

State of art

7 events, 2000 tickets

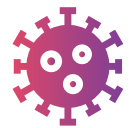

App downloadable in every store

Website graphic interface ready

Check-in app already used in events

COVID-19 automatic report already used in events
